Project Name	Smart waste management system

DevelopTheWebApplicationUsingNode-RED

Aim: Develop the web application using Node-RED Steps Followed:

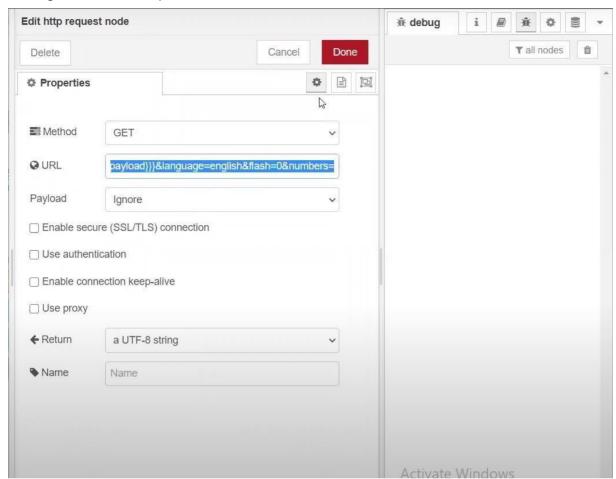

> Opened a Node-RED project

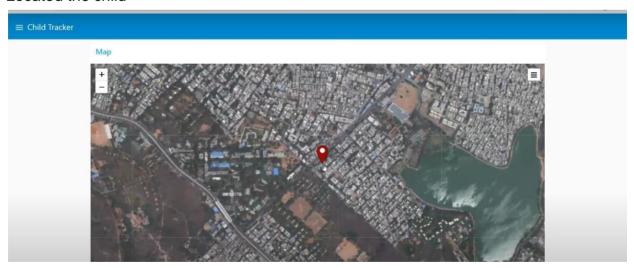

Added code to get child location in python

```
import json
import wiotp.sdk.device
import time
myConfig = {
      "identity": {
    "orgId": "hj5fmy",
    "typeId": "NodeMCU",
    "deviceId": "12345"
      "auth": {
            "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
While True:
           name= "Smartbridge"
            #in area location
           latitude= 17.4225176
           longitude= 78.5458842
            #out area location
            #latitude= 17.4219272
           #longitude= 78.5488783
myData=('name': name, 'lat':latitude, 'lon':longitude)
client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
print("Data published to IBM IoT platfrom: ",myData)
time.sleep(5)
client.disconnect()
```

➤ Editing the HTTP Request URL

Located the child

Python script sending requests to IBM Cloud

```
Editor - C:\Users\HP\Desktop\child.py
                                                                                                           child.py 🖸
                                                                                                               Console 2/A 🗵
                                                                                                                Data published to IBM IoT platfrom:
